RENEWAL
1949—2015

New York City began its adopted "urban renewal" in 1949 to get ready for a period of growth, including the people living there. The structures and people had to be removed or replaced to make room for new public and private developments. The legacy of these neighborhoods and the places remains active across the city, with streets named after specific places to symbolize how the neighborhoods transformed and were taken over by new public and private developers.

Organized by DRP, designed by Partner & Partners, with support from Mapper, Green Gnome, and Third World Renewal.

THE RINK
depicts a space cherished by skaters and a city strug-
reminiscent of 1970s roller discos. This documentary
however, the streamers and lights of the interior are
bordered by public housing and a highway. Upon
This concrete structure is nestled in a public park
NJ, is one of the few remaining urban rinks of its kind.
