

Project list for Saturday 4/16 Workday

① Hang birdhouse on fence near Java St. in corner.
Suggested directions: Remove birdhouse door. Find pre drilled hole. There is another pre drilled hole on bottom "lip" of birdhouse. I think this is meant to be nailed to a tree. Instead, maybe bolt it to the wooden sign from the back (so it faces the interior of the garden)? Or find some other way to hang it so that bird has a stable home - 

② Wood from old raised beds

option A: Bag it up and cart it off.

option B: Cut into chiminea size pieces using Milwaukee power saw ^{and} / or hacksaw, then store in labelled dry space reserved for firewood.

either option or combo is fine but the wood must go away b/c we are getting large mulch delivery there!

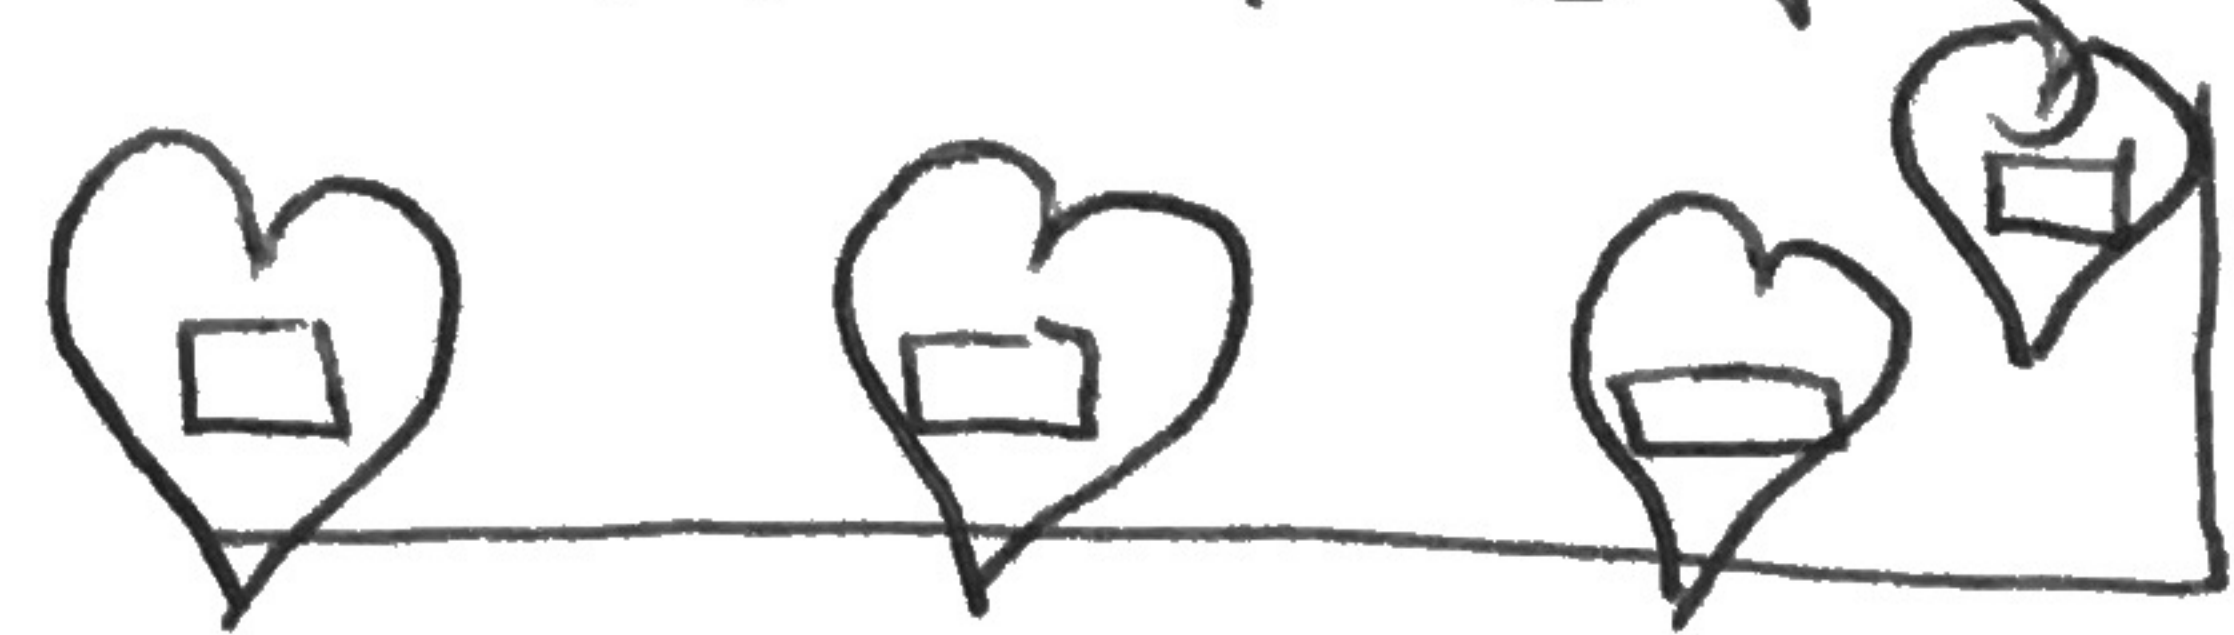

③ Plant fava beans & cucumber seeds in back bed where netting is - oops... See #4. They want to climb netting. LABEL!

④ Move strawberries to their permanent home in the front of the garden. They can live in the small raised bed by themselves (since they like to take over.) LABEL!

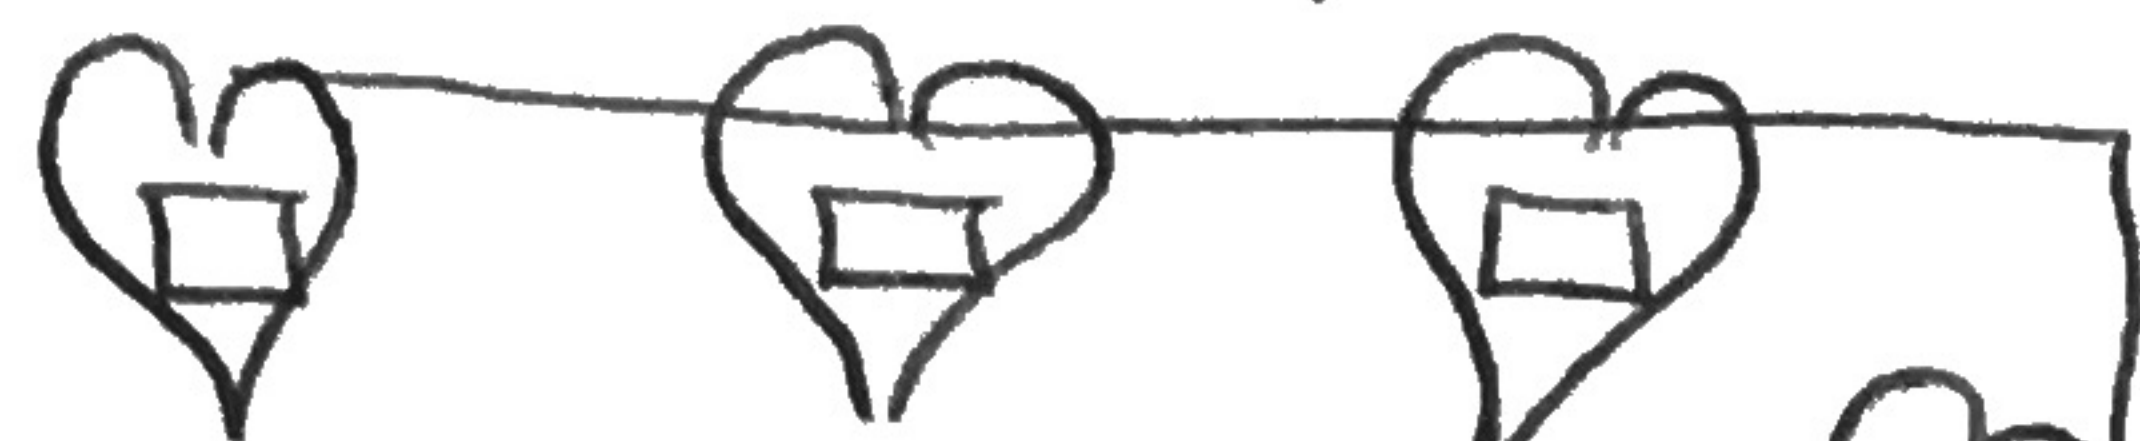

⑤ Plant Kale, lettuce and similar seeds in the front beds. label everything w date. ~~oops~~

⑥ Compost: Sift middle bin with screen to remove plastic stickers & other trash. Move clean compost to left bin. Put the large compost that does not get thru screen back into the right hand bin.

FRANKLIN STREET

JAVA STREET

WEST STREET

⑦ Street tree beds: We have adopted these street trees which need to be cleaned and mulched and loved. Wear gloves! ♡
